

# Top ten reasons to register your code with the Astrophysics Source Code Library (ASCL.net)!

Free online registry of codes used in astronomy research  
Making codes discoverable since 1999

Shows confidence in your research

Indexed by ADS and Web of Science

It's free!

Makes your code citable on its own merit

Citations to ASCL entries are trackable by ADS

Allows others to find your code easily

Easy submissions form, or import information from CODEMETA.JSON file

Associated links from ADS entries for papers to ASCL entries

Makes astronomy research more falsifiable transparent reproducible... better!

Citations by ASCL ID accepted by over 50 journals including all major astro journals

Largest indexed resource for astronomy research codes in existence, with 1,400 codes!

## AUTHORS AND ACKNOWLEDGEMENTS

Alice Allen, Kimberly DuPrie, Judy Schmidt, G. B. Berriman, Jessica D. Mink, Robert J. Nemiroff, Thomas Robataille, Lior Shamir, Keith Shortridge, Peter J. Teuben, John F. Wallin, Rein Warmels

We thank P. Wesley Ryan and ADS for publication statistics, the Heidelberg Institute for Theoretical Studies for financial support, and Michigan Tech and the University of Maryland for general support.
